TURN KEY STR

A clear path from room search to confirmed stay.

Wix website structure, photo naming, variable pricing, secure ID, Green Payments and room-inventory controls.

43 routes/templates | 11 supplied media assets | 20 article topics | 3 complete blog drafts

Prepared October 30, 2026. Existing Wix site reviewed. Build specification only; payments, ID verification and inventory integrations are not live.

Build brief and package map

The website should sell a specific room for specific dates, at an accepted complete price, through one booking authority. A general payment link and an independent calendar cannot provide that result.

Deliverable	What it contains
Page map	43 public, checkout, account and future routes with copy, CTA, section order and controls.
Room inventory	Three candidate guest rooms; one unavailable manager-suite draft. Final room facts and capacities still require confirmation.
Photo package	Eleven named source assets with descriptions, alt text and permitted-use status; ten additional requested photographs.
Pricing	Draft floors/bases/ceilings; owner overrides; frozen accepted quotes; fee and deposit examples.
Technical specification	Authoritative inventory, timed holds, secure ID, payment reconciliation, no-double-booking tests.
Blog content	Twenty-topic pipeline and three ready-to-edit original drafts.

Read the build specification for full detail. CSVs and JSON are neutral developer handoff files; they require mapping to the selected Wix/PMS fields. No one-click hotel-app import is claimed.

Build status and Wix implementation choice

Verified account context

Use existing site 3d2229a5-2c94-457e-b369-1efc6b92863b. It is published on a Free plan with Wix Hotels, Forms and Invoices V1. Velo is disabled; the time zone is America/Los_Angeles. No site, room calendar, payment setting or live page was changed while preparing this package.

Recommended production shape

Keep Wix as the mobile-first presentation, content and blog layer. Use one verified hotel PMS/channel manager as the inventory authority. First establish whether the current Hotels app is the previous app or Hotels by HotelRunner. If the PMS cannot support the chosen ID and Green Payments flow without creating a second inventory ledger, use a compatible embedded booking engine with its own authoritative checkout.

Native versus custom

Date-based rates and availability are documented HotelRunner capabilities. Competitor-based automated pricing, adult ID gating, dependent multi-room bundles and an unverified Green Payments gateway are separate integration work. They are not completed by adding Wix Bookings or a file-upload field. Wix Blog is not listed as installed on this site; add/configure it during implementation.

No checkout simulation

This is a build specification, supplied photo package and implementation data. It does not take deposits, store IDs or confirm bookings. All supplied room records have sales_enabled=false until the required production connections and room facts are approved.

Regional configuration

Use America/New_York, USD and consistent date-only lodging nights. Store event timestamps in UTC and render deadlines in property local time. Check daylight-saving transitions. Save a backup/export and existing future reservations before any app migration.

Room facts, prices and what remains unverified

Inventory identity

Create one physical resource each for TK-ALT-LOFT-01, TK-ALT-FULL-01 and TK-ALT-QUEEN-01. A descriptive room type for each has exactly one sellable unit. Manager Suite remains an unavailable future draft. Do not assume the existing Wix app has already been populated this way.

Owner-requested longer-stay amounts

Full room: $1,300 plus $150 cleaning. Loft: $1,500 plus $150 cleaning. The owner called these monthly amounts; a proposed 28-day package at those figures is a draft that needs explicit approval. Queen longer-stay pricing is not confirmed. Do not convert monthly wording silently.

Capacity and floor

The current photos identify the loft and shared areas, not every bedroom. Verify bed dimensions, bed count, room floor, egress and approved capacity before selling additional occupants. No five-worker loft claim, private-bath claim or fireplace feature may carry to other rooms.

Photos

Eleven supplied assets are renamed in media/ and mapped in data/photo_manifest.csv. Full-room and queen-room shots are requests, not invented media files. The separate Ramada photographs are excluded from the property package.

Priority owner decisions

Confirm the final public brand/domain, queen rate, monthly versus 28-day wording, safe occupancy, short-stay cleaning charge, reservation-credit policy, damage deposit schedule, cancellation plans and exact quiet hours. The plan makes these reviewable without publishing guessed settings.

Page design and mobile conversion rules

Visual direction

Use a clean lodging design: warm white background, charcoal body type, deep blue booking controls and one restrained accent color from the existing logo. Lead with the actual loft image. Use readable 16px body text, strong focus states and generous spacing. Avoid overlays that hide the room or promotional claims that are not established.

Primary navigation

Rooms; Corporate Stays; Rates; Local Guides; Contact. Add Services as a short menu for Laundry, Car Requests, Parking and Transport. A persistent mobile Check Availability button opens the same authoritative date search; it must not imply availability before the search completes.

Room cards

Show the actual room name and photo, bed information, shared/private bathroom fact, capacity once approved, cancellation choice and the total mandatory trip price for entered dates. Show refundable security separately. Until dates are entered, use a clear date prompt rather than an unqualified lowest-rate claim.

Room detail template

Gallery; name/summary; exact private/shared features; verified beds/capacity; stairs/access; amenity list; dated quote; total and deposits; cancellation/rules summary; booking action; contact; related room. Never swap another room photograph into an empty gallery.

Checkout usability

Keep room/dates/guests and price visible through the flow. Use mobile camera upload through the secure ID provider. Allow save-and-return for reviewed applications. Make errors specific, preserve non-sensitive progress and never force newsletter or text-marketing consent.

Cross-business links

Use a relevant service card on /laundry linking to https://www.freshfoldaltoona.com/. Use a local-guide author/bio or editorial link to https://tonyslice.com only where useful. Post-booking service offers must not obscure confirmation. Avoid repeated pop-ups, link exchanges and duplicate articles across businesses.

Page-by-page website structure

Launch pages are the initial build set, not automatically approved live pages. Expansion pages require unique verified content. Booking-flow routes are private or noindex, with real server authorization. Future routes remain unavailable drafts.

P01 Furnished Rooms in Altoona PA

/ | Launch | Index public content

Find owner-occupied furnished lodging for work trips, crew assignments and approved extended stays. See the room, shared spaces and full price before you reserve.

Sections: Hero with loft photo and dates; shared-house disclosure; room cards; who stays here; verified amenities; full-price explanation; corporate quote; laundry and car request; FAQs; phone/footer

Action: Check availability. Control: Do not show a live price until dates, guest count, inventory and the complete fee schedule are verified.

Fields: Check-in; check-out; adults; rooms needed

P02 Rooms & Suites

/rooms | Launch | Index public content

Compare the loft, full-bed room and queen room. Bedrooms are private; designated household spaces are shared. Every room has its own description and booking calendar.

Sections: Date search; room cards; bed and bathroom comparison; shared amenities; total-price cards; accessibility questions; crew quote

Action: View room. Control: One calendar per physical room; no generic inventory pool that can allocate the same room twice.

P03 Loft Suite in Altoona

/rooms/loft-suite | Launch | Index public content

The loft offers a queen bed, TV areas, a microwave, refrigerator/freezer and space to settle in during a work trip. The bathroom and approved house amenities are shared.

Sections: Photo gallery P03-P07; factual amenity list; exact bed/capacity panel; stairs disclosure; shared bathroom panel; date picker; full quote; house rules; related rooms

Action: Check loft dates. Control: Owner reports a queen bed. Additional beds, square footage and higher crew capacity require verification. Do not sell five beds from the current photos.

P04 Full-Bed Room in Altoona

/rooms/full-bed-room | Launch | Index public content

A private full-bed room with an owner-reported TV, Wi-Fi and refrigerator/freezer. Shared bathroom and household amenities are explained before booking.

Sections: Verified full-room photos; bed and workspace details; bathroom disclosure; verified amenities; rate calendar; complete quote; stay rules

Action: Check full-room dates. Control: Current reviewed photo set does not identify this room. Keep listing in draft until its own photos and availability are confirmed.

P05 Queen Room in Altoona

/rooms/queen-room | Launch | Index public content

An owner-reported queen room with a TV, workspace, Wi-Fi and refrigerator/freezer. Ask about dates and the layout that suits your trip.

Sections: Verified queen-room gallery; bed and workspace; bathroom proximity; verified amenities; current rates; complete quote; house rules

Action: Check queen-room dates. Control: Floor, capacity and 28-day rate remain unconfirmed. Do not label loft photos as the queen room.

P06 Rates, Fees & Deposits

/rates-and-fees | Launch | Index public content

Rates depend on room, dates, length of stay and approved occupants. Your quote separates lodging, mandatory fees, taxes, optional services and refundable security.

Sections: Date-based quote; nightly/weekly/28-day explanation; cleaning; reservation payment credit; damage deposit; cancellation plans; discount eligibility; examples

Action: Price my dates. Control: Future unsold nights may change. Confirmed reservations keep the agreed price. Final fee amounts require owner approval.

P07 Weekly Furnished Stays

/weekly-stays-altoona | Expansion | Index public content

Compare a seven-night furnished stay with the total cost of a hotel. Check shared-space arrangements, cleaning, parking and the dates you actually need.

Sections: Weekly use cases; seven-night total example; room comparison; laundry; extension process; FAQs

Action: Check seven-night dates. Control: Publish only with useful unique weekly content. Availability for an extension is never assumed.

P08 28-Day Furnished Stays

/28-day-furnished-stays-altoona | Launch | Index public content

Traveling for an assignment? Request a written furnished-room quote for up to 28 days, with dates, payment terms and any renewal process stated clearly.

Sections: Assignment fit; room options; owner-requested package pricing marked draft; included services; application process; payment schedule; renewal explanation

Action: Request extended stay. Control: Do not claim that 28-day cycles change legal status or remove guest rights. Rebooking requires new approval and available dates.

P09 Corporate & Crew Lodging

/corporate-crew-lodging | Launch | Index public content

Request room options for contractors, healthcare travelers, utility crews and other working visitors. Get a written quote for named travelers and exact assignment dates.

Sections: Company use cases; rooms and verified capacities; quote form; invoice/card/ACH options subject to approval; parking/laundry; employer FAQs

Action: Request a crew quote. Control: A quote is not a reservation. Company purchase orders alone do not reserve inventory.

Fields: Company; coordinator; business email; phone; dates; adults; rooms; worksite; payment preference; add-ons

P10 Stays Near UPMC Altoona

/stays-near-upmc-altoona | Launch | Index public content

Compare furnished rooms for healthcare assignments or medical visits in Altoona. Ask about the location, shared bathroom, stairs and the schedule you need.

Sections: Medical traveler needs; exact location/map after verification; commute guidance; quiet-space details; Wi-Fi/workspace; rooms; FAQs

Action: Find medical-stay dates. Control: No affiliation with UPMC is implied. Do not publish a two-minute drive claim without an actual checked route.

P11 Travel Nurse Housing

/travel-nurse-housing-altoona | Expansion | Index public content

Get a room quote that matches your assignment dates and budget. Review quiet hours, shared-space routines, laundry options and extension rules before paying.

Sections: Assignment checklist; actual daytime-noise policy; workspaces; seven/28-day comparison; laundry; cancellation options; company quote

Action: Request assignment dates. Control: Do not promise daytime silence, dedicated medical housing or agency partnerships without evidence.

P12 Contractor & Construction Stays

/construction-crew-lodging | Expansion | Index public content

Coordinate a clean furnished stay for approved workers, with a written rooming list, arrival plan and optional laundry or parking where available.

Sections: Worksite/shift needs; rooming list; safe occupancy; laundry handling; approved parking; billing; quote form

Action: Get a contractor quote. Control: No equipment storage, oily laundry service or large-truck parking guarantee unless operations confirm it.

P13 Penn State Event Stays from Altoona

/penn-state-event-stays-altoona | Expansion | Index public content

Looking beyond State College for an event trip? Check actual travel distance, event dates and the complete room price before choosing an Altoona stay.

Sections: Altoona location disclosure; official event links; actual drive estimate; event minimums; rooms; cancellation; transport request

Action: Check event dates. Control: Altoona is a different city. Do not claim campus proximity, shuttle inclusion or an official Penn State relationship.

P14 Amenities & Shared Spaces

/amenities-shared-spaces | Launch | Index public content

Your booked bedroom is private. The listing explains the shared bathroom, lounge, food-storage areas, approved appliances and optional services.

Sections: Private/shared matrix; room-specific TV/fridge/Wi-Fi; living area gallery; kitchen limitations; towels; stairs; optional services; camera disclosures

Action: Compare rooms. Control: No stove, washer/dryer access, fireplace, private bath or premium bandwidth claim unless the booked room includes it in writing.

P15 Parking Options

/parking | Launch | Index public content

Tell us your vehicle size and dates. Any paid off-street space must be confirmed separately and shown in your booking summary.

Sections: Verified space photos; map; vehicle limits; price; accessibility questions; arrival instructions; request form

Action: Request parking. Control: Sell only controlled, lawful, insured spaces. Neighbor-yard carports and public-street spaces are not confirmed inventory.

Fields: Dates; vehicle type; dimensions; number of spaces; room reference

P16 Laundry Pickup & Delivery

/laundry | Launch | Index public content

Ask about pickup, wash-and-fold and return delivery from Fresh Fold Altoona. Service availability, turnaround and the current laundry price are confirmed separately.

Sections: How pickup works; link to FreshFoldAltoona.com; guest instructions; special-soil handling; separate order terms; room return link

Action: See Fresh Fold services. Control: Do not reuse unverified historical laundry prices. A laundry order does not reserve a room.

P17 Car Rental Requests

/car-rentals | Launch | Index public content

Submit your trip dates and intended use. A car is offered only after vehicle availability, driver eligibility, insurance and payment terms are approved.

Sections: Date/use request; verified vehicles when available; personal versus approved delivery use; license requirements; deposit; separate agreement; room cross-link

Action: Request a car. Control: Lead-only at launch. No claim that any vehicle is automatically approved for Uber, DoorDash or Grubhub.

Fields: Dates; driver age eligibility confirmation; intended use; contact; room reference; pickup preference

P18 Transport & Errand Requests

/shuttle-errands | Launch | Index public content

Request a pickup, drop-off or shopping errand for your stay. Routes, times, operator availability and the total price are confirmed before payment.

Sections: Service area; schedule request; passenger/bag limits; quote; cancellation; accessibility inquiry

Action: Request transport. Control: No automatic $65 daily shuttle promise until operator, licensing/insurance, route and schedule are approved.

Fields: Route; dates/times; passengers; bags; mobility needs volunteered; contact

P19 Property Photo Gallery

/gallery | Launch | Index public content

Browse labeled property photos. Each image belongs to a specific room or shared area, so you can understand the layout before booking.

Sections: Room tabs; shared areas; image captions; room links; photo date; missing-photo suppression

Action: Choose a room. Control: Only photos of this property; exclude the separate Ramada photos. Internal inspection photos are not marketing images.

P20 Altoona Travel Guide

/altoona-travel-guide | Expansion | Index public content

Find useful planning notes for work assignments, local errands, laundry, transport and event trips. Check linked operators for current hours and terms.

Sections: Work travel; medical trips; eating/shopping; laundry; State College travel; recent guides; room CTA

Action: Read the guides. Control: Only list real destinations and checked links. Disclose paid placements and business ownership where relevant.

P21 Altoona Stay Guides

/blog | Launch | Index public content

Straightforward guides to furnished rooms, work trips, longer stays and the total cost of lodging in Altoona.

Sections: Featured guide; categories; recent articles; author/update dates; related rooms; subscription optional

Action: Read a guide. Control: Use original locally useful articles. No spun city pages, fabricated reviews or claimed hotel price averages.

P22 Booking Questions

/faq | Launch | Index public content

Find answers about private rooms, shared spaces, ID verification, payments, deposits, cancellations and extensions.

Sections: Rooms/shared areas; bookings/ID; costs; deposits/refunds; arrivals; accessibility; services; contact

Action: Check dates or ask a question. Control: Answers must match checkout and the accepted policy version. FAQ content does not guarantee search rich results.

P23 About Turn Key STR

/about | Launch | Index public content

Turn Key STR focuses on furnished stays for people traveling through Altoona for work and other approved visits. Ask questions before choosing your room.

Sections: Real operator story; owner-occupied disclosure; actual service area; verified credentials only; contact; rooms

Action: Talk about your stay. Control: Use the registered operating/contracting entity where required. Do not publish the private holding company as marketing copy by default.

P24 Contact & Corporate Quotes

/contact | Launch | Index public content

Call or text 570-494-7523, or send your dates and room needs. A message or quote request does not hold a room.

Sections: Click-to-call/text; simple inquiry; response expectations; corporate quote; location disclosure; emergency distinction

Action: Send a stay request. Control: Publish only monitored contact channels. Do not promise 24/7 staffing.

Fields: Name; email; phone; dates; guests; question; communication consent

P25 House Rules & Shared Living

/house-rules | Launch | Index public content

Review quiet hours, registered visitors, shared-bathroom care, approved appliances, smoking restrictions and assigned access before accepting your booking terms.

Sections: Plain-language summary; private/shared use; quiet hours; visitors; kitchen/appliances; bathroom; linens; monitoring; damage; support

Action: Review booking terms. Control: Proposed 11 PM-7 AM quiet hours. Final rules must be consistent and accepted before payment; no arbitrary removal or automatic undisclosed penalties.

P26 Cancellation & Deposit Policy

/cancellation-and-deposits | Launch | Index public content

Your selected rate plan states the cancellation deadline, reservation-payment treatment and damage-deposit process before you pay.

Sections: Flexible versus advance purchase; local time deadline; reservation credit; damage hold/refund; operator cancellation; no-show; processing timelines

Action: Review your rate plan. Control: No default nonrefundable claim before the final policy is approved. Operator unavailability or booking error must trigger refund/remedy handling.

P27 Privacy & ID Verification

/privacy | Launch | Index public content

Read what information is needed to arrange your stay, who handles ID checks and payments, and how to request help with your information.

Sections: Operator contact; data purposes; ID provider; payment provider; sharing; retention; cookies; requests; camera location policy

Action: Contact privacy support. Control: Privacy text must identify actual vendors and retention periods at launch. No raw IDs in public CMS or analytics.

P28 Accessibility & Room Access

/accessibility | Launch | Index public content

Ask about stairs, entrances, bathroom arrangements, parking and the features of the specific room you plan to book.

Sections: Room-by-room stairs; measured doorway/access details when checked; bathroom layout; assistance contact; website feedback

Action: Ask an access question. Control: Do not label a room accessible without a verified feature list. A loft is not a step-free room.

P29 Lodging Booking Terms

/lodging-terms | Launch | Index public content

The final agreement identifies the room, travelers, dates, full price, payment schedule, cancellation policy and applicable house rules.

Sections: Contracting entity; booked dates; occupancy; fees; payment; privacy/monitoring; conduct; damage; changes; lawful termination; applicable law

Action: Review before acceptance. Control: Use locally reviewed terms. Do not rely on a 28-day label, no-mail clause or agreement title to decide legal rights.

P30 Room Availability

/availability | Booking flow | Noindex / protected where required

See rooms available for your selected dates, including the full mandatory price and any refundable security amount.

Sections: Date/party search; available rooms; full-trip totals; rate plan choice; request alternative dates; corporate quote

Action: Select this room. Control: Live inventory read; no result caching that can commit a sale. Sold-out results offer new dates without charging.

Fields: Dates; adults; selected room

P31 Guest & Stay Details

/book/details | Booking flow | Noindex / protected where required

Enter the traveler and contact details needed for this reservation. We will show the exact room, dates and complete quote throughout checkout.

Sections: Timed hold; room/date summary; lead guest; adult occupants; trip purpose optional except approved work packages; optional add-ons

Action: Continue to ID verification. Control: Server creates expiring hold on physical room before checkout. Required details and inventory are checked on the server.

Fields: Legal lead name; contact; adult occupant names; arrival preference; billing party

P32 Secure Guest ID Check

/book/verify-id | Booking flow | Noindex / protected where required

Each adult traveler must complete the approved ID check. Use the secure upload flow; please do not email an ID or send it in an ordinary contact form.

Sections: Purpose/privacy notice; hosted secure verification; supported ID guidance; upload status; manual-review help; return to booking

Action: Verify my ID. Control: Provider session binds to booking and guest. Verification required before paid confirmation; review does not hold dates indefinitely.

Fields: Verification session; consent; provider reference; status only in booking record

P33 Review Price & Rules

/book/review | Booking flow | Noindex / protected where required

Check the room, dates, travelers, full price, refund terms and amount due today. Your reservation payment counts toward the stay total.

Sections: Room/private-shared facts; nightly breakdown; mandatory total; refundable deposit separate; balance date; selected policy; required acceptance

Action: Accept and continue. Control: Record quote ID/version, accepted policy versions and timestamp. A changed expired quote needs clear new acceptance.

Fields: Terms/house rules; cancellation acceptance; payment consent; optional marketing consent

P34 Secure Reservation Payment

/book/payment | Booking flow | Noindex / protected where required

Use the approved payment provider to complete your reservation payment. A payment return page alone is not proof that a room is booked.

Sections: Hosted payment fields/redirect; due today; remaining balance; security authorization separate; processing; failure/retry help

Action: Pay and reserve. Control: Signed server-side webhook/API verification plus valid held inventory is required. No PAN/CVV stored in Wix collections.

Fields: Provider token/reference; never card details in site forms

P35 Booking Confirmation

/book/confirmation | Booking flow | Noindex / protected where required

A confirmed reservation shows its reference, room, dates, accepted total and payment record. Pending reviews are labeled clearly.

Sections: Confirmed or pending state; room/dates; receipt; balance/deposit; rules; check-in next steps; manage booking; laundry offer

Action: View my booking. Control: Only display CONFIRMED after inventory commit, identity requirements and required payment succeed. Pending is not confirmed.

P36 Manage My Booking

/my-booking | Booking flow | Noindex / protected where required

View your reservation, payment schedule and accepted terms. Request a change, cancellation, add-on or extension from your secure booking link.

Sections: Authenticated booking summary; documents/status; balance; change/cancel; rebook; deposit status; support

Action: Request a booking change. Control: Signed short-lived login link or authenticated account; server checks ownership on every request. Changes reprice only with agreement.

P37 Pre-Arrival & Check-In

/check-in | Booking flow | Noindex / protected where required

Complete any remaining requirements and receive the approved arrival instructions for your room.

Sections: Identity/payment checklist; confirmed arrival window; assigned entrance/parking; guide; emergency contact; access instructions

Action: Complete pre-arrival. Control: Release door/access details only to authorized confirmed travelers; never put entry codes in analytics, public pages or calendar feeds.

P38 Extended-Stay Application

/extended-stay-application | Booking flow | Noindex / protected where required

Submit the information needed for a reviewed stay. An application, screening fee or approval does not reserve dates without the required reservation step.

Sections: Dates/room needs; employment/assignment where relevant; screening notice; secure ID; references if needed; application fee disclosure; status

Action: Submit for review. Control: Any $25 fee must have a disclosed scope/refund policy. Credit/background consent and sensitive data go through a vetted separate provider.

Fields: Contact; dates; assignment/company; references if needed; separate screening consent

P39 Corporate Quote Request

/corporate-quote | Booking flow | Noindex / protected where required

Give us assignment dates, traveler counts and room needs. We will confirm the rooms, approved services and payment terms in writing.

Sections: Company details; rooming needs; worksite; invoice/ACH preference; add-ons; quote status

Action: Request written quote. Control: Quote validity and hold expiry must be explicit. No automatic hold for an unanswered quote.

Fields: Company; coordinator; traveler count; dates; rooms; billing contact; PO reference optional

P40 Multiple-Room Crew Booking

/crew-room-bundle | Expansion | Index public content

Ask for a coordinated booking of available guest rooms. Private and shared areas, owner occupancy and total capacity will be stated in the quote.

Sections: Room bundle choices; occupancy; shared-house disclosure; exact rooming list; full quote; corporate terms

Action: Request a room bundle. Control: Bundle consumes the same physical room inventory. Never advertise exclusive whole-house use while the owner remains in the house.

P41 Manager Suite

/rooms/manager-suite | Future draft | Noindex / protected where required

This option is a planning draft. It is not available to reserve until the room, private bathroom, access and operating availability are verified.

Sections: Verified future photos; private bath/access evidence; final amenities; capacity; rates; availability

Action: Ask about future availability. Control: Do not sell the owner-occupied suite or reuse its features on other rooms.

P42 List Your Property

/list-your-property | Future | Noindex / protected where required

Interested in a future lodging marketplace? Share your business details for a possible listing after partner onboarding opens.

Sections: Partner criteria; ownership/authorization; insurance; availability integration; fees not finalized; waitlist

Action: Join the partner waitlist. Control: No paid listing or inventory promise before marketplace operations, contracts and payment responsibility are ready.

P43 Future Vehicle Partners

/rent-your-car | Future | Noindex / protected where required

Vehicle partner listings are a future feature. Submit an expression of interest without paying or uploading sensitive driver documents here.

Sections: Eligibility concept; commercial/rental coverage; maintenance; availability; future terms; waitlist

Action: Register interest. Control: Separate vehicle resources, agreements, tax and insurance; never count cars as room inventory.

Photo filenames and room assignments

Existing image bytes are copied with descriptive names. A descriptive filename does not establish capacity, square footage or an amenity promise. Marketing candidates still need a current-condition review. Full and queen rooms need their own photos.

P01 | Shared bathroom

turn-key-str-altoona-shared-bath-shower-01.jpg

Bathroom view with shower curtain, vanity and floor mats.

Alt: Shared bathroom with a shower curtain and vanity at Turn Key STR in Altoona.

Shared bathroom	turn-key-str-altoona-shared-bath-clean-wide-04.jpg Bright, clean bathroom wide shot with no personal items
Shared kitchen	turn-key-str-altoona-shared-kitchen-approved-appliances-02.jpg Approved shared appliances and food-storage area
Property	turn-key-str-altoona-exterior-arrival-01.jpg Actual property exterior with current appearance and arrival context

Shoot clean, current wide views before tight detail photos. Do not photograph guests, IDs, vehicle registration plates, entry codes or private screens. Use accurate alt text; do not describe items absent from the photograph. Export web-optimized responsive versions during site implementation while retaining the source originals.

Variable pricing and owner adjustment controls

What may change

The owner may set date-specific nightly rates, minimum stays, advance-booking windows, approved discounts and stop-sales for unsold inventory. Log actor, timestamp, room, date range, prior value, new value, reason and rule version. Confirmed reservations and unexpired accepted quotes keep their agreed amount.

Draft nightly limits

Full room: $60 floor, $60 weekday/$75 weekend starting base, $175 ceiling. Queen: $75 floor, $75 weekday/$95 weekend base, $225 ceiling. Loft: $95 floor, $95 weekday/$125 weekend base, $400 ceiling. These are proposed configuration limits, not market-verified rates or live offers.

Rule priority

Stop-sale/occupancy rules first. Then valid signed corporate rate or unexpired accepted quote; then owner date override; then approved event/season rule; then automated adjustment; then last approved base fallback. Close inventory overrides every sales rule. A contract never creates an extra room.

Minimum stay

Draft normal minimum is two nights. Four- or five-night holiday/event minimums apply only to specific approved date ranges and arrival rules; never to an entire hunting season by assumption. Maximum booking window and any 24-36 month forward availability must match published rates and inventory.

Comparable-price inputs

Use licensed data, permitted APIs or a manual comparison sheet. Record provider, capture time, identical stay dates, traveler count, bath arrangement, cancellation terms and total mandatory cost. Do not scrape Hotels.com, Airbnb or hotel sites without permission. State College demand is a signal; its hotel prices are not automatically Altoona comparables.

Draft adjustment algorithm

For each unsold night: candidate = approved base x season factor x event factor x lead-time factor x occupancy factor, clamped to the room floor and ceiling. Avoid applying an event premium twice. A separate optional trip-cost target compares the complete stay cost with appropriate competitor offers; it never drives the stay below the approved contribution floor.

Guardrails

Start in recommendation mode. If fewer than three usable comparables exist or data is older than 24 hours, use the last approved base and flag review. Ordinary automated changes are capped at 15% per run as a draft guardrail; bigger event moves need approval. Proposed review times are 7:30 AM, noon and 6:30 PM Eastern. No scheduled automation was created.

Quote lifecycle

Create an immutable quote snapshot with dates, room, occupants, line items, policy version and expiry. A ten-minute checkout quote/hold is a draft starting point. Expiry triggers revalidation and a newly accepted price; never charge a newly raised amount under an old acceptance. Repricing availability does not revise paid bookings.

Reservation payments, refundable security and price examples

Reservation payment

Recommended draft: $250 or the full total if the total is below $250, credited toward the lodging booking. Do not represent the same $250 as both a payment credit and an additional fee. Owner approval is required because earlier notes also requested a nonrefundable $250 fee.

Damage deposit

Separate from revenue and the lodging balance. Draft standard security: $200, with a consistent written room/stay/add-on schedule inside the requested $100-$1,000 range. Avoid arbitrary individualized amounts. Label whether it is a temporary authorization or a collected refundable charge, with inspection, documentation and release/refund rules.

Other charges

Owner requested $150 cleaning per booking/month; the precise scope is unresolved. A $25 reviewed-stay application fee is a draft and needs scope, refund policy and consent. Optional parking, laundry, transport, console or car charges require actual inventory, terms and approved current prices. Tax mapping must be verified for the property and each charge before live checkout.

Discounts

Proposed 5% eligible-worker/veteran/first-responder discount applies to approved accommodation charges only; verify eligibility consistently. A proposed 10% prepaid multi-period discount requires approved future dates and a written contract. No automatic discount stacking, no reduction of refundable security, and no changing existing reservations without agreement.

The short-stay fee problem

At $60 x two nights plus a mandatory $150 cleaning fee, the price is $270 before taxes, or $135 per night. At seven nights it is $570 before taxes, or $81.43 per night. This cannot support an unconditional cheaper-than-hotels claim. Consider approving a lower short-stay cleaning fee while keeping $150 for a longer stay; that choice is not applied in this package.

28-day illustrations

If the owner approves the same price for a 28-day package: full room $1,300 + $150 = $1,450 before tax ($51.79/night); loft $1,500 + $150 = $1,650 before tax ($58.93/night). A $250 reservation payment leaves $1,200/$1,400 of those totals respectively, before any taxes and separate security. These illustrations are not public quotes.

Cancellation plan design

Offer clear plans such as Standard Flexible and Advance Purchase only after actual deadlines/refund amounts are set. Use an exact Eastern-time deadline. State the treatment of screening fees, no-shows, early departures and operator cancellations. Damage security is not automatically forfeited merely because a guest cancels.

Preventing double bookings across every sales channel

Inventory invariant

For any physical room and occupied night, there may be at most one active inventory claim. A claim can be a timed hold, confirmed reservation, owner block or maintenance block. Two visitors can view a room at the same time, but only one may acquire its dates for checkout.

Authoritative calendar

Website, phone, corporate, walk-in and OTA reservations all use one PMS/channel manager. Enter manual reservations and owner/maintenance blocks through that same authority before confirming. Never create a parallel Wix CMS room calendar or a separate spreadsheet that can sell independently.

Atomic reservation

Use the PMS native atomic reservation/hold mechanism where verified. If a custom booking authority is required, use transactional storage with a unique physical-room/night claim and all-or-nothing acquisition across the date range. A check-then-insert availability query without a transaction is insufficient. Wix CMS is not assumed to provide the required multi-record reservation transaction.

Night boundaries

Use [check-in date, check-out date) so the departure date is not charged as a sleeping night. A same-day arrival can use that room only after the configured turnover window. Early check-in, late checkout and maintenance can create additional blocks and must recheck the following booking.

Whole-house and crew dependencies

A crew bundle references the same underlying physical rooms. Lock/claim all requested rooms in stable order and roll back everything if one is unavailable. Selling a bundle blocks each child room; selling any child prevents a conflicting bundle. The manager suite is excluded while owner-occupied or unavailable.

Cross-channel risk

Use verified two-way API/channel-manager integrations where supported. Periodic iCal polling has delay and must not be treated as a real-time guarantee. If a channel lacks adequate sync, keep that channel on request/approval or stop selling its conflicting stock. API sync also needs monitoring; no multi-platform system should promise zero overselling under every outage.

Fail closed

If the PMS or sync is unhealthy, disable instant confirmation and paid checkout; offer a request form with no payment. A stale successful search never authorizes a sale. If integration is unavailable, do not silently collect money and promise the room.

Acceptance evidence

Run simultaneous last-room attempts; overlapping date attempts; separate adjacent nights; crew-bundle versus individual-room attempts; phone block versus online checkout; expired hold retry; delayed payment webhook; duplicate webhook; OTA import conflict; DST/turnover scenarios. The losing reservation must not be charged and confirmed as a second sale.

ID, payment and inventory as one booking flow

Booking states

DRAFT -> HELD -> ID_VERIFIED/APPROVED -> PAYMENT_PENDING -> CONFIRMED -> CHECKED_IN -> CHECKED_OUT. Separate terminal states include EXPIRED, REJECTED and CANCELLED. ID, payment, inventory, booking and security-deposit states must be tracked separately, so a payment event cannot overwrite a rejected ID state.

Short-stay sequence

Search dates; atomically hold the selected physical room; capture guest details; run hosted adult ID verification; accept quote and rules; process the required reservation payment; verify payment server-side; finalize inventory and send confirmation. If a review outlasts the hold, release it and recheck dates before payment.

Reviewed stay sequence

Application and ID review can happen without a hard inventory promise. After approval, issue a dated quote and acquire a fresh limited hold when the guest is ready to pay. An application fee or approval notice alone never reserves a room. Corporate coordinators receive the same clear status.

Payment verification

Do not trust a browser success redirect or a client-supplied amount. Validate webhook signatures, provider transaction, currency, amount, merchant identity, quote reference and idempotency key. Process a repeated webhook once. Verify current inventory claim and required approvals before setting CONFIRMED.

Late and failed payment

If a payment arrives after hold expiry and the room is now claimed, do not create a second booking. Void an authorization or refund a capture as appropriate, open an operator exception and notify the customer of the actual status. Reconciliation must detect paid-but-unconfirmed and confirmed-but-unpaid records.

Balances and holds

A booking can be confirmed with the disclosed reservation payment if the chosen plan permits a later balance. Record the precise balance due date and reminder/collection rules. Damage-card authorizations have provider-defined expiry; do not assume a card hold lasts a 28-day stay. Long stays may need a separately approved refundable charge or permitted reauthorization.

Cancellation and changes

Compute the refund against the accepted policy snapshot. Cancel/update the authoritative PMS inventory with an auditable payment operation and retry handling. Do not reopen dates on a browser action alone. An extension claims its additional nights before confirming; a room move changes both resources consistently.

Secure ID upload and privacy implementation

Required guest identity

Require each adult occupant to complete an approved government-issued ID check before paid confirmation, with a support route if verification fails. A company booking does not automatically verify every traveler. Collect the minimum necessary information; do not put identity documents into an ordinary public form or gallery.

Preferred route

Use a vetted hosted ID-verification provider with a booking-bound session. The website receives a verification reference and status rather than exposing document images to normal site editors. Choose a provider, supported documents, review process and data-processing terms before implementation.

If direct upload is necessary

Use private storage with authenticated server authorization, short-lived signed upload/read access, random object names, encryption, audit logging and restricted reviewers. Permit only required image/PDF types and size limits; validate actual content, scan files and strip unnecessary location metadata. Test denied access across unrelated guest accounts and unauthenticated requests.

Wix limitation to verify

Wix supports file-upload fields, and its media APIs document temporary private download URLs. That does not prove that the current Forms setup is suitable for IDs. Do not use public media URLs, broad collaborator access or noindex as access control. Establish the whole private-upload and review design before collecting real documents.

Application data

Use a separate vetted screening provider for any credit/background check and its consent process. Do not collect Social Security numbers, online-banking credentials or complete payment-card data in Wix inquiry forms. Request employment or references only for the approved stay policy.

Retention and disclosure

Before launch, publish actual vendors, purposes, access roles and a documented retention/deletion schedule. A proposed minimization approach is to delete raw ID copies promptly after verification unless a documented requirement justifies retention. Do not invent a mandatory legal retention period. Keep verification reference/status and necessary audit records under the approved policy.

Staff access

Owner/admin can manage bookings; approved manager can review identity only when necessary; content editor can edit room copy but cannot see IDs; cleaning staff see turnover/room status without financial or identity documents. Use MFA and separate accounts. Public schema, logs and marketing tools never receive raw ID data.

Green Payments / Jim integration brief

Current status

Green Payments is the preferred merchant relationship, but Jim's identity, exact gateway, merchant approval, credentials and Wix compatibility are not verified. Do not assume a processor/reseller name is a usable software gateway. No account was connected and no payment was run.

What Jim must identify

Provide the gateway product/name and current API/hosted-checkout documentation; whether a supported Wix connector already exists for this US lodging merchant; tokenization/hosted fields; sandbox access; signed webhooks; sale/auth/capture/void/refund; deposit and delayed-balance support; security-hold duration; card-on-file consent; Apple/Google Pay and ACH if available; settlement, reserves, fees and supported lodging operations.

Integration choice A

If the gateway is actually available to this site in the appropriate payment settings and works with the verified hotel app, use that supported connector. Confirm deposit, tax, balance, refund and inventory behavior end to end. Availability in a provider marketing list is not a completed integration.

Integration choice B

If an appropriate Velo/site custom-provider route exists for the chosen gateway and hotel flow, scope and test it from current official documentation. Enable/configure custom development only after confirming compatibility. The Wix PSP service-plugin route also describes provider onboarding; it is not a promise that any individual merchant can instantly add any gateway.

Integration choice C

Use a compatible external PMS/booking checkout that supports the actual Green Payments gateway. Embed or link it from Wix, with server-verified payment and the same inventory authority. A generic Green payment link followed by an unrelated room calendar does not meet the no-double-booking requirement.

Data and security

Credentials belong in the backend secrets facility and approved provider configuration, never in page code, CSV imports, screenshots or this package. Hosted payment UI handles card entry. Webhook secrets and signature verification must be tested with retries, fraud/decline cases and refund reversals.

Copy/paste request to Jim

Jim, we are building the Turn Key STR lodging website on Wix. Please identify our exact Green Payments gateway and send its Wix integration and developer documentation. We need secure online reservation payments, refundable damage deposits or supported authorizations, later balances, refunds and signed payment webhooks. Please confirm lodging approval, sandbox access, hold duration, fees and whether HotelRunner or a compatible booking engine is supported. Please provide credentials through a secure setup method, not ordinary email.

SEO, blog structure and competing for local bookings

Competitive position

Compete for local direct-booking intent with factual room photos, complete prices, clear shared-house descriptions and quick corporate quotes. Hotels.com is a distribution marketplace; copying its page volume or interface will not establish equivalent inventory or trust. Do not claim the cheapest room, a hotel classification or a number-one ranking without evidence.

Keyword map

Use one primary intent per substantive page: furnished rooms Altoona; rooms near UPMC Altoona; weekly furnished rooms; 28-day furnished stays; corporate crew lodging; construction crew stays; Penn State trips from Altoona. Add long-tail questions in useful paragraphs and supporting articles. Expansion pages stay unpublished until they have unique helpful content.

Metadata and URLs

data/page_map.csv gives each route, H1, title, opening copy, keyword and indexing rule. Final titles and descriptions are human-editable. Use the final primary domain for canonical URLs; do not publish the provisional domain as schema. Meta-keywords tags are not part of the build requirement.

Structured content

Use accurate LodgingBusiness/Accommodation descriptions where appropriate, room-specific offers only when current and bookable, BreadcrumbList and Article/BlogPosting for guides. Include factual FAQ text where useful. Do not force Hotel status, star ratings, fabricated review aggregates, stale prices or guaranteed rich-result claims.

Technical indexing

Index substantive public pages and articles. Exclude checkout, applications, verification, confirmations, booking management, signed links, internal search/date filters and draft partner pages from the XML sitemap. noindex does not secure private data; authentication and authorization do. Add redirects for any replaced public routes and preserve working existing links.

AI/search clarity

Use consistent business and room names, concise factual paragraphs, explicit private/shared features, current photo captions, real author information and update dates. Keep pages crawlable and answer practical questions. There is no guaranteed AIO/LLM ranking trick or fixed number of keyword types.

Blog taxonomy and links

Categories: Work Travel; Medical Stays; Rates and Planning; Extended Stays; Local Services; Events. Each article links to one primary relevant landing page, one room/services page and a genuine contact/availability action. The three supplied drafts are original launch content; twenty topics form the pipeline.

Evidence and local promotion

Verify official university/event calendars before event posts, actual local routes before commute claims and current provider terms before prices. Directory profiles should use consistent real business details only where eligible. Do not create fictitious offices or duplicate location listings. Invite honest reviews from actual guests without fabricated ratings.

Blog calendar

Publish three completed drafts first, after facts and links are checked. Add future pieces only when the operating service and unique local information are real. Relative weeks are a proposed sequence, not scheduled automations.

Furnished Rooms Near UPMC Altoona: What to Check Before You Book

An assignment or medical visit goes more smoothly when you understand the room before you arrive. A low nightly price is only part of the decision. Your travel dates, bathroom arrangement, work schedule and complete booking cost matter too.

Start with the actual location

Ask for the property location and check your route to the destination you will use. A listing that says Altoona should not leave you guessing about the neighborhood or commute. Travel time depends on your shift and road conditions. Turn Key STR should publish a checked map and practical arrival guidance before making any precise drive-time claim. The property does not imply a UPMC affiliation.

Know which spaces are private

At Turn Key STR, the offered bedroom is private and designated household areas are shared. Compare the specific room's bathroom access, stairs, workspace and refrigerator rather than assuming every room has the same features. If you need a private bathroom or step-free access, ask before paying. The current loft photographs show a sloped ceiling and several living and storage features; they do not establish the features of a different bedroom.

Match the stay to your schedule

Tell the operator your arrival window and any shift-related needs. Posted quiet hours are useful, but they are not a promise of silence throughout the day. Confirm any early arrival or late departure in writing. An extension is a separate availability decision, even when you hope to remain for the full assignment.

Compare a complete written quote

Ask for the lodging subtotal, cleaning, any approved additional-occupant charges, taxes and optional services. A reservation payment should be shown as a credit toward the quoted total. A refundable damage deposit is a separate amount with its own release process. Read the cancellation deadline for the rate you select, particularly if an assignment could move or end early.

Plan everyday services

Check the included Wi-Fi arrangement, food storage and permitted appliances. Laundry pickup and delivery may be requested through Fresh Fold Altoona; confirm the service's current price and turnaround separately. Parking and transportation also require availability confirmation. A service inquiry does not reserve a room.

Before completing a booking, use the secure ID-verification process and review the shared-house rules. Do not email identification or card details to an ordinary contact address.

Ready to compare options? Review stays near UPMC Altoona (/stays-near-upmc-altoona), look at the rooms (/rooms), or request a quote (/contact) for your exact dates. No room is held until the reservation process confirms it.

Original launch draft. Check final page links, approved prices and published service facts before posting.

Weekly Furnished Rooms vs Hotels in Altoona: Compare the Full Cost

When you need a room for a work week, compare the full trip rather than a headline nightly price. A furnished bedroom and a hotel room may also provide different experiences, so the cheapest number is not the whole answer.

Use the same dates and traveler count

A fair comparison starts with identical check-in and check-out dates and the same number of travelers. Check whether each offer has a private or shared bathroom, which cancellation terms apply and what services are included. A private furnished room in an owner-occupied house should be described that way when compared with a hotel.

Add mandatory charges before comparing

Here is an illustration, not a live quote: seven nights at $60 per night equal $420. If a mandatory $150 cleaning charge applies, the total becomes $570 before any taxes or other applicable mandatory charges. That is about $81.43 per night for the seven-night trip.

The same cleaning charge changes a shorter stay much more. Two nights at $60 equal $120; adding $150 produces a $270 total before taxes, or $135 per night. This is why a site should show the complete mandatory price as soon as the dates are known. The final fee schedule at Turn Key STR must be approved before paid bookings open.

Separate a payment credit from an extra fee

If the reservation requires $250 toward the stay, that payment reduces the remaining balance by $250. It is not added a second time. A refundable security amount is different: the quote should show the amount, whether it is a card authorization or an actual charge, and the refund or release conditions. An authorization expires according to the provider's rules; it is not an indefinite deposit.

Consider the practical differences

Compare the actual bed, bathroom, stairs, work area, refrigerator, approved kitchen use and cleaning arrangements. Ask about parking instead of assuming a street space is reserved. Check laundry separately, and do not count a car-rental request as a confirmed vehicle. Use a rate with cancellation terms suited to your plans.

Confirm extensions before relying on them

A seven-night booking covers its approved dates. Another traveler may reserve the following week. If your assignment could continue, ask about the full likely date range and a written extension process before arrival. Changes need available inventory and an agreed new quote.

You can compare rooms (/rooms), read the rates and fee explanation (/rates-and-fees), or ask for a corporate crew quote (/corporate-crew-lodging). Use the full quote for your dates to decide whether the stay fits your budget.

Original launch draft. Check final page links, approved prices and published service facts before posting.

Crew Lodging in Altoona: A Checklist for Contractors and Coordinators

A crew booking works best when the coordinator and lodging operator agree on the rooming list, assignment dates and payment responsibilities before anyone travels. A few clear details prevent confusion at arrival and when the job schedule changes.

Send exact dates and room needs

Include check-in and check-out dates, the number of adult workers, preferred room arrangement and the jobsite area. Tell the operator about shifts or unusual arrival times. Do not assume that seating, a couch or empty floor space counts as an approved bed. Each offered room needs a verified capacity, and a multiple-room quote should identify the physical rooms it includes.

Ask how shared spaces work

Turn Key STR is planned as owner-occupied furnished lodging with shared household areas. The quote should explain bathroom access, quiet hours, permitted appliances, storage and housekeeping. Booking all available guest rooms does not automatically mean exclusive use of an entire house. If a crew needs that arrangement, it must be specifically offered and approved.

Agree on billing before arrival

Provide the company's billing contact and any purchase-order reference. Ask whether card, invoice or ACH payment is available for the approved account. A purchase order, an unanswered quote or a pending payment does not by itself reserve inventory. The quote needs an expiry time, amount due, balance date and a clear confirmation process. List any security deposit separately from the lodging total.

Confirm vehicles, laundry and arrival logistics

Tell the operator the number and size of work vehicles. A paid space must actually be available and suitable for the vehicle. Discuss workwear and special-soil laundry needs with the laundry service before sending items. Ask about pickup and return schedules, and confirm any transport request separately. These services should appear as approved items rather than assumed inclusions.

Plan changes and substitutions

Jobs move, workers rotate and assignments extend. Ask who may authorize a name change, additional traveler or extension. New occupants need approval and the required ID verification. A later week must be checked against the same room calendar used for every other reservation. There is no automatic renewal of a sold-out room.

Use a secure application or verification service for sensitive information. A coordinator should not send copies of every worker's ID or payment card through ordinary email. Each traveler needs to receive the applicable house rules and arrival instructions.

Send a corporate quote request (/corporate-quote) with your dates and rooming needs. The written proposal should make the room, services, accepted price and reservation status clear to both the coordinator and the travelers.

Original launch draft. Check final page links, approved prices and published service facts before posting.

Data model, administration and measurement

Public content records

Rooms; RoomMedia; Amenities; PublicPolicies; GuideArticles; ServiceLinks. Public content contains no live authoritative reservation ledger, raw IDs, door codes or card tokens. Import supplied CSV/JSON only after mapping fields in the chosen CMS; these are content handoff files, not guaranteed one-click hotel-app imports.

Protected operational records

PhysicalUnit; InventoryClaim; Reservation; Guest; VerificationReference; QuoteSnapshot; PriceRule; RateCalendar; PaymentTransaction; SecurityDeposit; PolicyAcceptance; ChannelMapping; AuditEvent. Each reservation references the physical resource and frozen quote. Store booking states and payment states independently.

Inventory data semantics

An inventory claim includes resource ID, local stay date, booking/hold reference, claim kind, expiry when applicable and state. Claims are enforced by the authoritative PMS or a transactional database. Expired holds must be released under a transactional check; time passing alone does not remove a stale database row.

Owner dashboard

Calendar by physical room; arrivals/departures; held/confirmed/reviewed status; unsold rate changes; channel health; balance and security status; paid-unconfirmed exceptions; maintenance/owner blocks; requests; audit trail. A manual override never bypasses a conflicting confirmed reservation.

Guest communications

Send confirmation only after the required booking state exists. Pre-arrival details follow approved identity/payment requirements. Check-out inspection drives security release/refund. Review invitations go to actual guests. A message failure creates a retry/alert, not a duplicate payment or reservation.

Measurement

Track date-search success, room views, quote starts, ID starts/completions, payment success, confirmed reservations, cancellation rate, paid-but-unconfirmed count, average stay, room revenue, conversion and direct-booking acquisition cost. Exclude damage security from room revenue; suppress PII in analytics.

Abandoned checkout

With appropriate consent, send a secure recovery link that rechecks dates, identity status and price. An abandoned hold expires. A recovery discount never revives sold inventory or bypasses the price floor. Track separate consent for marketing texts; no customer messages were sent from this task.

Marketplace later

Other hosts need verified listing authority, tax/insurance/payment responsibilities, documented complaint/refund processes and a supported availability feed. Own-inventory placement should be disclosed if results favor it. Vehicle listings use their own resources and eligibility system. Native apps must call the same booking authority.

Implementation sequence and launch acceptance

1. Stabilize the existing site

Export future reservations and site/content references; verify hotel app version; correct New York time zone; choose primary domain and actual operator details; confirm appropriate site and hotel subscriptions. Do not purchase subscriptions or migrate reservations without the owner accepting the concrete plan/cost.

2. Verify the sellable inventory

Confirm physical rooms, bed sizes, floor/access, safe occupancy, availability, current amenities and photographs. Stage and photograph the full/queen rooms. Establish owner/maintenance blocks and the source calendar. Keep unverified listings unavailable.

3. Build public pages

Implement the Launch pages using the supplied route map and copy. Add actual room media, gallery labels, full-price presentation, policies, mobile navigation and three blog drafts. Install/configure Wix Blog if selected. Add approved redirects and final-domain SEO.

4. Prove the booking engine

Choose the PMS authority; verify timed holds, per-room resources, manual/OTA synchronization and reviewed-stay flow. Resolve room-bundle dependencies. Execute the no-double-booking scenarios before live sales.

5. Connect identity and payment

Get Jim's actual gateway documentation and approved merchant setup. Implement secure ID and hosted/tokenized payment. Test deposit/balance, signature verification, duplicates, failures, late webhook compensation, refunds and security hold expiry using sandbox data.

6. Validate a real end-to-end reservation

After sandbox passes and owner approves the launch settings, run one authorized low-value production test through search, ID, payment, inventory, receipt, cancellation and refund. Check every other connected channel. Record references and reconciliation evidence, then remove test inventory cleanly.

7. Open and monitor

Enable only verified rooms and dates. Monitor sync and payment exceptions before adding channels or automating prices. Add event/nurse/contractor pages when unique verified content is ready. Expand marketplace and native apps after the operating flow is proven.

Definition of done

A guest can see the exact room and full cost, submit ID securely, pay through the approved processor and receive a truthful booking status. Two competing attempts cannot confirm the same physical room/night. Owner edits future unsold rates without changing existing contracts. Operational staff can reconcile bookings, balances and refunds.

Meaningful acceptance tests

These tests specify production behavior. They have not been executed against a selected PMS or gateway, because those services are not connected. The final engine must provide evidence for each passing scenario.

ID	Scenario / expected result
INV-01	Two users attempt the last available room for identical nights Exactly one claim/confirmation; loser is not captured and confirmed.
INV-02	Reservations overlap by one night Second overlapping claim rejected; no partial multi-night booking.
INV-03	Departure and new arrival on the same day Allowed only with configured turnover and no conflicting late checkout.
INV-04	Crew bundle races with a single-room booking All bundle resources lock together or bundle fails; no duplicated child room.
INV-05	Manual phone/maintenance block is entered during checkout Authority resolves the conflicting claim consistently; no second confirmation.
INV-06	External channel event arrives late or sync becomes unhealthy Alert/stop-sale or request-only fallback; no blind paid instant confirmation.
PAY-01	Payment declined or customer leaves checkout No confirmed reservation; hold expires/releases without duplicate charge.
PAY-02	Same signed payment webhook is delivered repeatedly One transaction and one booking state transition.
PAY-03	Browser success URL is opened without valid payment No confirmed booking.
PAY-04	Payment clears after hold expiry and room is sold No second reservation; void/refund/reconciliation exception.
PAY-05	Webhook amount/currency/merchant/signature is wrong Reject/quarantine event; do not confirm.
PAY-06	Guest pays reservation credit then balance Credit deducted once; remaining amount accurate; security tracked separately.

Acceptance tests - continued

ID	Scenario / expected result
PAY-07	Security authorization expires during longer stay Expiry detected; only approved lawful reauthorization/alternative process; no indefinite-hold promise.
PAY-08	Cancellation and partial/full refund require retry Accepted policy applied once; auditable refund and inventory state.
ID-01	Guest attempts to fetch another guest ID/booking Denied on server; no private document or personal data disclosed.
ID-02	ID verification requires manual review past hold expiry Dates released; fresh inventory and quote acceptance required before payment.
ID-03	Unsupported or malicious file is uploaded Rejected/isolated; no executable public asset and no leaked ID URL.
RATE-01	Owner changes unsold rates after a confirmed booking New shopping quote changes; confirmed booking amount does not.
RATE-02	Quote expires and automatic rate changes Show and accept new quote before any charge.
RATE-03	Competitor feed is missing/stale or lacks enough comparable rooms Use last approved rate and alert; never scrape or guess a live comparison.
TIME-01	DST transition, local midnight, event minimum and max stay Property-local nights and exact deadlines remain correct.
WEB-01	Mobile screen reader, keyboard, camera upload and form errors Usable labels/focus/errors; no sensitive values leak to analytics.
SEO-01	Crawler visits checkout, draft, room and guide pages Only substantive approved public pages index; no PII or false availability markup.

Source and capability notes

Official Wix sources were retrieved on October 30, 2026. Older-app documentation is identified explicitly. Product documentation establishes a capability, not completion of this account setup or Green Payments compatibility.

Source	Capability or evidence used
Wix site context read, 2026-10-30	Existing site; Free plan; Wix Hotels installed; Velo disabled; America/Los_Angeles time zone. Exact installed Hotels version is not established solely by the app label.
Wix Hotels version comparison	New and previous hotel apps differ. Verify version and migration before choosing features.
HotelRunner inventory calendar	Date-specific rates, inventory and restrictions in the new app.
HotelRunner rate plans	Rate-plan types; pricing changes also need inventory/bulk updates. This is not an automatic competitor-price engine.
Legacy channel-manager checklist	Legacy-specific multiple-unit, blocking and sync caveats. Do not apply blindly to the new app.
Current hotel payment providers	New HotelRunner app supports providers available in the site Accept Payments section. Green Payments compatibility is not established by this statement.
Legacy hotel deposits	Older deposit choices and balance limitations apply only to the original app.
Wix payment provider plugin	PSP integration is an implementation path, not proof that a particular merchant gateway is supported. PSP onboarding is described here.
Wix file upload field	File uploads exist and require the applicable premium Forms feature. A file upload field alone does not establish suitable private ID handling.
Private file download URLs	Authenticated generation of temporary private-file download links is documented. Full upload/storage permissions must still be designed and tested.
Upgrade new Wix Hotels	Upgrade is required to enable the documented online reservation/payment features; no current subscription price was verified.
Owner source document	Current source blueprint and embedded property photos reviewed; newer user instruction selects Wix and Green Payments as preferred direction.

Source labels link to official pages. The Markdown specification retains the complete source URLs.
